Professional Summary

Computer Science Engineering graduate with strong foundations in Data Structures, Algorithms, and backend development. Experienced in building database-driven applications and AI-based systems. Currently strengthening full stack development skills with focus on REST API design and scalable web applications.

Education

B.Tech – Computer Science Engineering
ACS College Of Engineering

Dec 2022 – Jul 2026
CGPA: 8.70/10

Technical Skills

Languages: Java, SQL, JavaScript (Basic)

Web Technologies: HTML, CSS, React

Backend & Frameworks: Flask (Basic), Node.js, TensorFlow, Spring Boot

Databases: MySQL, MongoDB

Tools: Git, GitHub

Projects

Resume Analysis and Job Matching

Tech Stack: Python, FastAPI, React.js, Tailwind CSS, TypeScript

- Developed an automated system to analyze resumes and match candidates with suitable job roles.
- Built an NLP-based model to extract skills and keywords from resumes and job descriptions.
- Implemented backend APIs using FastAPI and integrated them with a responsive frontend interface.

AI-Powered Real-Time Sign Language Translator

Tech Stack: Python, TensorFlow, OpenCV

- Built a computer vision system to recognize Indian Sign Language gestures.
- Implemented deep learning models for gesture classification and text conversion.
- Applied preprocessing techniques to improve model performance.

AI Code Debugger Application – TRACE

Tech Stack: React Native, Golang, Ollama, REST APIs, PostgreSQL

- Developed an AI-powered application to automatically detect and debug errors in code.
- Implemented AI models to analyze code, explain issues in simple terms, and suggest corrected code.
- Built backend services using Golang and integrated REST APIs with a mobile-friendly frontend.
- Designed a user-friendly interface for code input, language selection, and real-time debugging output.

Internship Experience

Java Development Intern — Pinnacle Labs

Sept 2025

- Assisted in backend module development using Java and OOP principles.
- Debugged application-level issues to improve system stability.

Machine Learning Intern — SkillCraft Technology

Sept 2025

- Built and evaluated machine learning models using Python and Scikit-learn.
- Performed data preprocessing and validation.

Software Development Intern — MR Tech Lab LLP

Feb 2026

Duration: 3 Months (Hybrid)

- Delivered three projects across web and mobile platforms during the internship.
- Developed a Resume Analysis and Job Matching system using NLP techniques.
- Built an AI-based Code Debugger mobile application (APK) for error detection and correction.
- Designed a Smart Learning System with integrated web and mobile functionality.
- Gained experience in full-stack development and REST API integration.

Certifications

Database Management System – Infosys Springboard
SQL and Relational Databases 101 – CognitiveClass.
